«PANZER KPFW IV»

The Panzer IV was developed in the first few months of the 2nd World War to provide the German armoured forces with a better protected vehicle carrying a 7.5 CM cannon. This was a reaction to the limits of its predecessor – the model III with a 5 CM cannon – compared to the threat of the enemy's means, in particular the soviet T 34s which were equipped with an arm of that calibre as well as good armour plating. The model IV tank was extensively used on all fronts during the 2nd World War by the German Army. Many different gradually improved versions were produced to face the on-going improvements of the opponents' means.

Der Panzer IV wurde in den ersten Monaten des zweiten Weltkrieges entwickelt, um die deutschen Panzerdivisionen mit einem durch eine 75 mm Kanone besser geschützten Fahrzeug zu versorgen. Es war eine Reaktion auf die begrenzten Möglichkeiten des Vorgängers - des PzKpffw.III mit einer 5cm Kanone - den gegnerischen Typen Parole zu bieten, besonders den sowjetischen T-34, die auch ähnliche grössere Geschütze und bessere Panzerung besaßen. Der Panzer IV war auf allen Kriegsschauplätzen des zweiten Weltkrieges weit verbreitet. Viele, ständig geänderte Versionen wurden produziert, um den kontinuierlichen Verbesserungen der gegnerischen Panzer zu begegnen.

Il Panzer IV venne sviluppato nei primi mesi del 2° conflitto mondiale per dotare le forze corazzate tedesche di un mezzo equipaggiato con un cannone da 7.5 CM. e dotato di maggiore protezione, visti i limiti del precedente modello III con arma da 5 CM., nei confronti della minaccia dei mezzi avversari, in particolare i T 34 sovietici dotati di un'arma di quel calibro e con una buona corazzatura. Il carro armato modello IV venne estesamente utilizzato dall'Esercito tedesco su tutti i fronti durante tutta la 2° Guerra Mondiale ed in numerose varianti progressivamente potenziate per far fronte al costante miglioramento dei mezzi avversari.

Le Panzer IV a été développé dans les tous premiers mois de la 2^{ème} G.M. pour équiper les forces allemandes d'un tank mieux protégé et équipé d'un canon de 75 mm. En effet, le Panzer III avec canon de 50 mm avait montré ses limites

face aux engins ennemis, en particulier le T-34 soviétique armé d'un canon de ce calibre et doté d'un blindage très efficace. Le Panzer Type IV fut intensivement utilisé sur tous les théâtres d'opérations de l'armée allemande. Différentes versions améliorées se succédèrent pour faire face aux nouveaux engins utilisés par les alliés.

De Panzer IV werd ontworpen gedurende de eerste maanden van de 2^e Wereldoorlog om het Duitse leger van een betere tank met een 7,5 cm. kanon te voorzien. Dit in reactie op de beperkingen van zijn voorganger - de Panzer III met een 5 cm. kanon - die niet opgewassen bleek tegen de met name T-34's, die een 76mm. kanon hadden en veel zwaardere bepantsering. De Panzer IV werd in grote getale gebruikt op alle fronten tijdens de 2^e Wereldoorlog. In de loop van de oorlog verschenen er vele verbeterde varianten om het hoofd te bieden aan de voortdurend beter worden tanks van de tegenstanders.

El Panzer IV fue desarrollado en los primeros meses de la 2da. Guerra Mundial para proveer a las fuerzas armadas alemanas de un vehículo mejor protegido provisto de un cañon de 7.5CM. Está fue una reacción a las limitaciones de su predecesor - el modelo III con un cañon de 5 CM - comparadas con las amenazas de los medios enemigos, en particular los T-34 soviéticos que estaban equipados con un arma de dicho calibre así como con una buena placa de blindaje. El tanque modelo IV fue extensamente utilizado en todos los frentes durante la 2da. Guerra Mundial por el Ejército Alemán. Varias versiones posteriores mejoradas fueron fabricadas para contrarrestar las permanentes mejoras de los medios oponentes.

四號坦克於第二次世界大戰首
數月開發成功，為德國裝甲師團
提供一種擁有7.5cm加農炮的較
佳火力支援車，這可以說是因為
其前輩——裝備一門5cm加農炮
的三號坦克——在面對敵人攻
擊，特別是蘇聯T34一類裝備有
大口徑火炮及良好裝甲的坦克
時，有著種種不足，因而逼切開
發的二次大戰中德國於各條戰
線大量使用四號坦克，為了對抗
不停推陳出新的敵人新武器，四
號坦克也有多種不同的改良
型。

Istruzioni per l'applicazione delle decalcomanie. Ritagliare le decalcomanie accortamente dal foglio, immergerle in un bicchiere d'acqua pulita per circa 1/2 minuto, metterle in posizione sul modello e fare scivolare dalla carta per una migliore aderenza comprimere con una pezzuola pulita.

Directions for applying the decals: Cut the required decals out of the sheet, dip them into a glass of clean water for about 1/2 minute, position the decals on the kit, letting them slide from the paper. For a better adhesion, press them by means of a clean rag.

Plädöring av decalerna: Klipp ut den decal som skall användas och doppa den i ett glas vatten under en 1/2 minut. Sätt decalerna på plats på modellen och låt den sakta glida av pappret. För att den skall sitta ordentligt, tryck till med en torr duk.

Anweisungen für Abziehbilder-Anbringung: Die benötigten Abziehbilder vom Blatt abschneiden, in ein Glas reines Wasser für etwa 1/2 Minute einweichen, auf das Modell legen und dann vom Papierbogen abheben. Um eine bessere Haftung zu erzielen, die Abziehbilder mit einem reinen Tuch andrücken.

Indstruksjeer for applicasjon des decalcomanias. Couper les decalcomanias choisies et les plonger environ trente secondes dans un peu d'eau propre. Les placer sur le modèle en les faisant glisser de leur feuille et presser avec un morceau de chiffon pour éliminer les bulles d'air.

Istruccioneeas para la aplicacion de las decalcomanias: cortar las requeridas, sumergirlas en un recipiente de agua limpia durante 1/2 minuto, colocar las decalcomanias sobre el modelo, haciéndolas deslizar sobre el papel. Para una mejor adherencia, presionarlas con un trapo limpio.

Transferen: Knip het benodigde deel uit, dompel het ca. 1/2 minuut onder water, houd het transfer legen het model en schuif het vanaf het papier op zijn plaats. Met een schoon doekje aandrukken.

FRANÇAIS: Couper les décals choisis, les plonger dans un verre d'eau propre pendant 1/2 minute, les placer sur le modèle en les faisant glisser de leur feuille et presser avec un chiffon propre pour éliminer les bulles d'air.

Русский язык: Вырезать необходимые детали, опустить их в чистую воду на 1/2 минуты, положить на модель, сдвигая с бумаги. Чтобы обеспечить хорошее прилипание, промокнуть детали чистой тряпкой.
