A/C 1 F-102A-60, S/N 56-1080, 496 FIS., Soesterberg Air Base, The Netherlands, August 1964. Command bands on upper fuselage. Bands on drop tanks spiral from front to back. Left tank: apply part 12 first, wrapping decal around tank tip. Then apply part 10 around the tank but ending at the pylon. Wrap part 8 around the tank, towards the rear tip of the tank. Repeat the same procedure with the left tank but in a counter-clockwise motion. Apply decal # 1 before # 2 & 3.

**Note**  
Modeller must paint the Pitot tube White before decaling on these two A/C. Remember, the Pitot tube tips are Silver.

A/C 2 F-102A-LO, S/N 56-1130 of the 525 FIS., Soesterberg Air Base, The Netherlands, early 1960.

Overall color was Gloss Air Defense Command Gray, FS. 16473, with Flat Black anti glare panels on the nose and the intake trunks. Radomes were Semi-Gloss Black, Bleaching out to a real Matt Black. Rear area of the fuselage and adjacent exhaust areas were a Stained Steel color. Leading edges of the intake and the intake ramp area were highly polished natural metal. Sometimes wing fences were painted in the squadron color. At times, the arrestor hooks were stripped in Black or Red. We recommend you obtain the latest issue of this Monogram/Revell Germany kit, number 04586. This kit has a very comprehensive stencil decal sheet.
