

As manufactured, P-35 cockpits were a natural aluminum color with instrument panels painted in a black "crackle" finish. First paint cockpit with Tamiya Flat Aluminum, then paint details of panels, seat cushion, tool cases, map boxes, life raft, engine cover and seat belts with various Olive Drab, Khaki and Brown colors from Tamiya or Polly S. When completely dry, wash with Grumbacher Burnt Umber heavily diluted with Prestested Odorless Thinner. When dry, drybrush with Chrome Silver. Instrument panels (kit parts C35 and C36) are Tamiya Semi-gloss Black.
