| 6. Left undercarriage leg / spat  | 19. Cockpit rear bulkhead         |
| 7. Right undercarriage leg / spat | 20. Front seat (2 pcs)            |
| 8. Left engine                    | 21. Bench seat (2 pcs)            |
| 9. Right engine                   | 22. Front seat head rest (2 pcs)  |
| 10. Propeller (2 pcs)             | 23. Control column (2 pcs)        |
| 11. Instrument panel              | 24. Foot step (2 pcs)             |
| 12. Tail wheel                    | 25. Control stick (2 pcs)         |
| 13. Dorsal fin                    | 26. Pitot tube                    |
|                                   | 27. Optional antennas             |

## General instructions:

Resin parts should be cleaned of flash, thoroughly cleaned using solvent and washed in detergent. For attaching resin parts use solely cyano-acrylate glue. Transparent parts should be glued using epoxy, white or crystal clear glue.

## Notes:

- all gear legs are enforced with wire
- small parts (additional antennas, position lights) should be scratchbuilt.

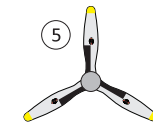

## Decal placement and painting tips

1. Fuselage stripe - left
2. Fuselage stripe - right
3. Tail stripe (both sides)
4. Registration (both sides)
5. Propeller decal

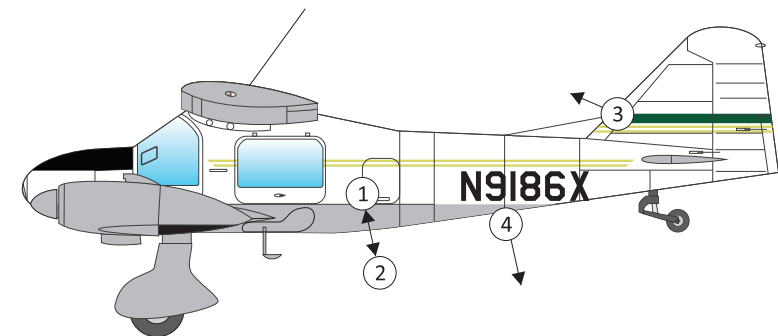

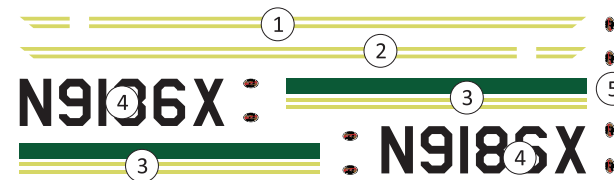

## Propeller painting and marking:

- front painted light gray
- propeller tips painted trainer yellow
- back painted matt black

## Notes:

- decals are home-made, so they require a bit of attention and trimming when cutting and applying.
- Aircraft is painted white, with light gray bottom part of the fuselage, wings, horizontal stabiliser, engine nacelles, main landing gear, propeller spinner; matt black anti-glare panel.
- For painting and detailing please use references available on internet
