SPECIAL RESIN PARTS

Prior to using the resin parts, trim and clean each single piece as shown in the instruction sheet - see the grey section of the instructions. This is essential in order to assemble these parts with the plastic kit. To join resin with plastic parts it is necessary to use a "superglue type" glue that is not contained in this box.

Per utilizzare le parti di resina è necessario eliminare, pulire, dai singoli pezzi le eccedenze rappresentate nel disegno di ogni singola parte in grigio. Senza questa operazione non sarà possibile assemblare i pezzi sul modello. Per incollare in posizione le parti di resina è necessario utilizzare collante di tipo "superglue" o bi-componente che non è incluso nella confezione.

Vor der Verwendung der Resin-Teile müssen diese sorgfältig bearbeitet und gereinigt werden - siehe spezielle Hinweise in der Bauanleitung. Dies ist sehr wichtig für die Verbindung der Resin-Teile mit den anderen Plastikteilen des Bauesatzes. Für diese Klebeverbindungen benötigt man Superglue-Kleber (Sekundenkleber) - nicht in dieser Packung.

Voordat men de kunstharz onderdelen gaat aanbrengen dient men ze eerst af te werken en schoon te maken zoals op de bouwbeschrijving staat aangegeven - zie het grijze gedeelte van de bouwbeschrijving. Dit is belangrijk voor het combineren met de plastic onderdelen van de bouwdoos. Voor het lijmen van de kunstharz onderdelen aan de plastic onderdelen dient men "superglue" te gebruiken; deze is niet in de doos aanwezig.

Antes de usar las partes de resina, limpie y desbaste cada una de las piezas como se indica en la hoja de instrucción - observe la sección gris de las instrucciones. Esto es esencial para ensamblar estas partes con la maqueta plástica. Para unir resina con partes de plástico es necesario emplear un tipo de pegamento a base de "superglue" que no está contenido en esta caja.

Avant d'utiliser les pièces en résine, les ébavurer et les nettoyer comme montré dans le manuel d'instructions - voir la partie grisée des instructions. Cette opération est essentielle pour pouvoir assembler ces pièces sur le kit en plastique. Pour fixer les pièces en résine sur les pièces en plastique, il est nécessaire
