Southlake, TX 76092

WHAT'S OUT THERE?
1/48th Kinetic F/A-18A/C
1/48th Hawgaus F/A-18A

On April 3, 2018 the 4th Wing Cold Lake, Alberta unveiled the 60th Anniversary of NORAD paint scheme to the public.

Captain Jeff Chester and Mr. Jim Bellevue were the designers of this scheme and the 1 Air Maintenance Squadron was the organization that brought this design to life. Captain Stefan "Porcelain" Porteous is the designated pilot for the 2018 demo season. Captain Porteous joined the RCAF in 2008. In 2012 he was selected to fly jets and received his wings in the CF-155 Hawk. He has been flying the CF-18 Hornet since 2014.

Special Thanks to Maj. Jennifer Jones and Anthony Wan for their assistance with this decal sheet.

Inside of Nose Gear Door

Note:
 RCAF Hornets utilize the Raytheon GAS-1 GPS Anti-Jam antenna. There is no aftermarket accessory for this modification but one could easily replicate this with some sheet plastic and masking. We have included photos and a template above so the modeler can scratchbuild this modification on their own.
