Greece have 2 types A-7. H and E. H was the first delivered type (A/TA) and main difference from E is the external refueling probe. So please check internet photos or private album for represent any plane you want.

USE SMALL NUMBERS
FOR TAIL NUMBER
0000111222233334444
SAME PLACE
OPPOSITE SIDE

About radar cone usually **BUT NOT STANDARD**
use black color. You can also find it with
ADC grey and OLIVE DRAB anti-glare panel

Ο κώνος του ραντάρ ΣΥΝΗΘΩΣ τον βρισκουμε
ΜΑΥΡΟ ΜΑΤ. Σε διαφορετική περίπτωση βαφόταν
με ADC GREY και OLIVE DRAB το anti-glare panel

USE BIG NUMBERS
FOR FUSELAGE

DECALS

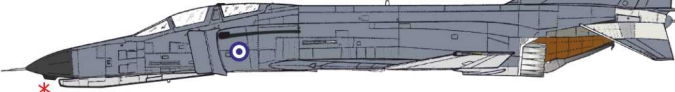

SEA (VIETNAM) CAMO

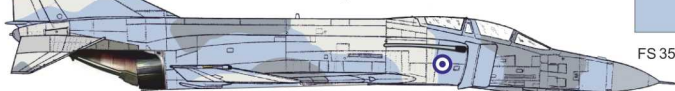

ONLY ONE SEA camo F-4E have the DIAS antennas on air intakes with BuNo 01511

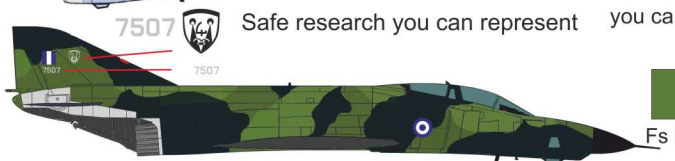

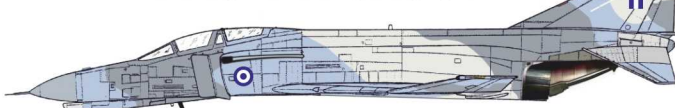

Planes with DIAS system have same antennas as AUP planes except the IFF. **WARNING** the front antenna that on AUP is on Vulcan M61 gun at BLUE F-4 was in front of it *

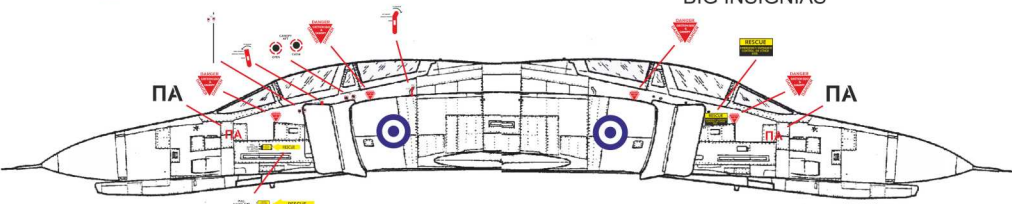

01511 was the first and only plane that have DIAS system with SEA CAMO the first painted AEGEAN BLUE AND ALSO the first painted AEGEAN GHOST

AEGEAN GHOST

LIZZARD ex G.A.F RF-4E EAB (HELLENIC AIR INDUSTRY) STYLE

For better representation of ANY plane you want built PLEASE CHECK any AVAILABLE REFERENCES on internet and private photos. WHEN we talking ABOUT HAF (Hellenic Air force) nothing is STANDARD (ok later types as M-2000 AND F-16 have many standards)

Use BLACK color stencils, letters (ΠΑ) TAIL NUMBERS and RESCUE panel for left side. Big sized insignias also

AEGEAN BLUE

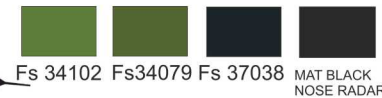

Same color for stencils as SEA BUT small insignias

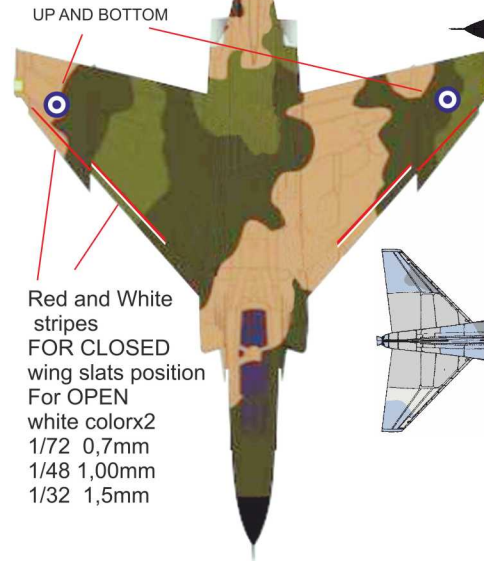

Dark Grey Fs 36118 stencils data Tail numbers and LEFT RESCUE panel and SMALL insignias standard for ALL latest AUP planes.

At early years of AEGEAN GHOST scheme (AUP and standard F-4E PLANES) you can find BLACK stencils data and even FS 36622

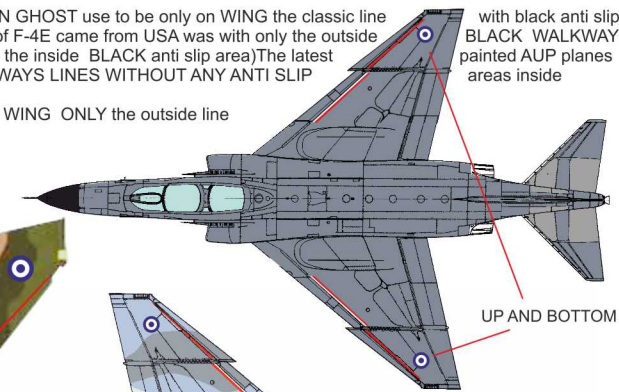

Planes delivered from GERMAN air force. Soon repainted from HAI in an LIZZARD "look" camo All stencils data TAIL numbers are in FS 36622 color BIG INSIGNIAS

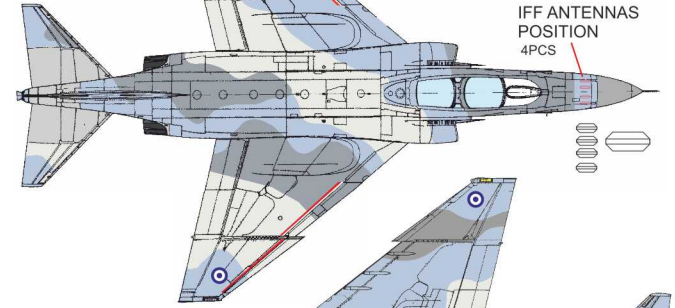

WALKWAYS on SEA ,AEGEAN BLUE and AEGEAN GHOST use to be only on WING the classic line inside . (PEACE ICARUS 1 that was the First part of F-4E came from USA was with only the outside LINE on WING without the inside BLACK anti slip area)The latest have ONLY ON FS 36118 LIZZARD RF-4Es has also ON WING ONLY the outside line

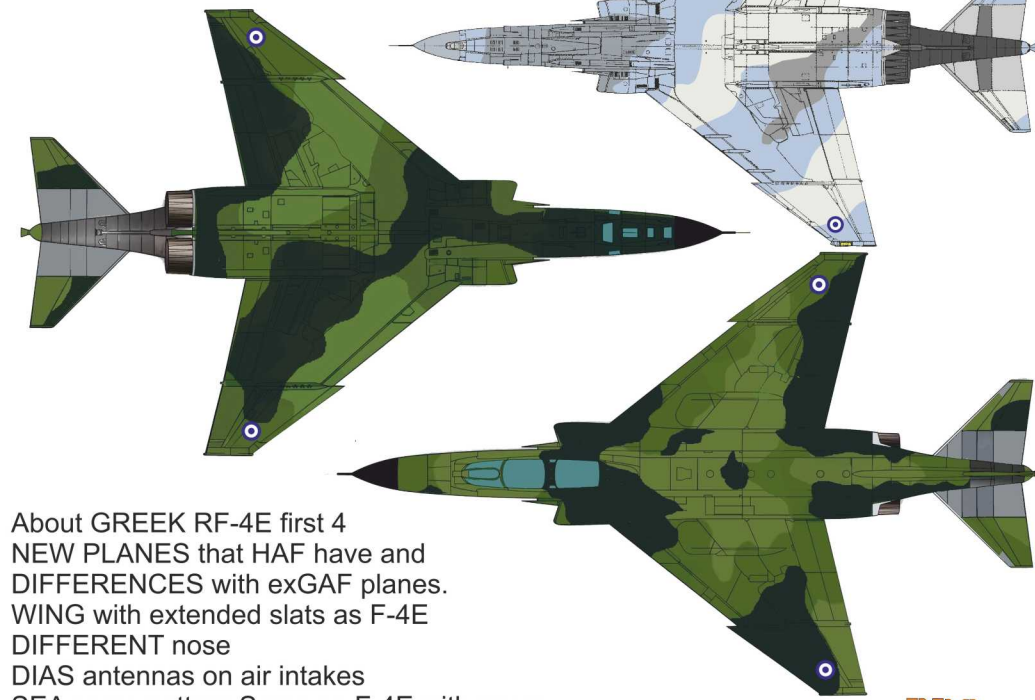

Red and White stripes FOR CLOSED wing slats position For OPEN white colorx2 1/72 0,7mm 1/48 1,00mm 1/32 1,5mm

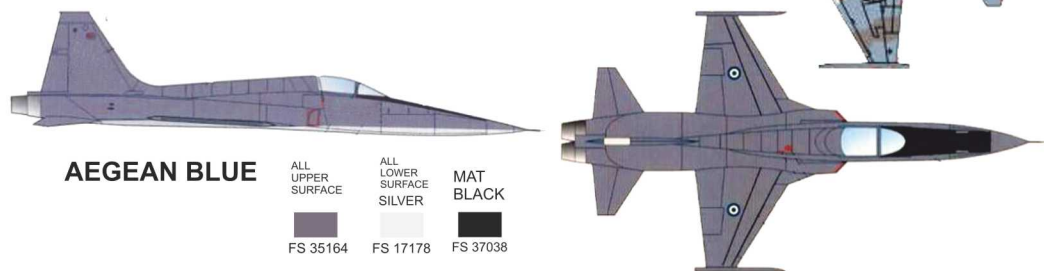

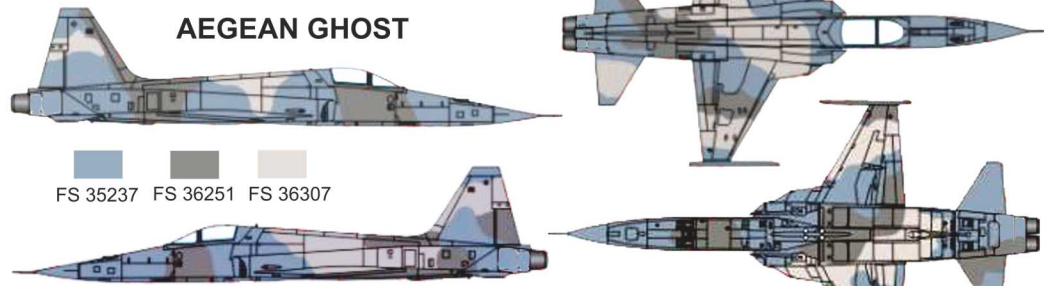

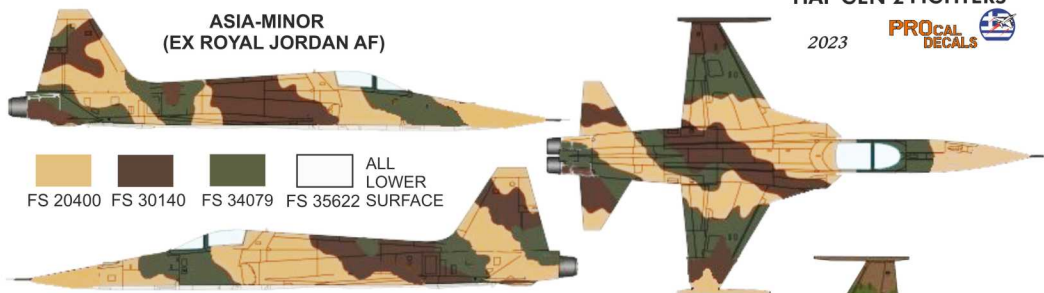

with black anti slip BLACK WALKWAY painted AUP planes areas inside

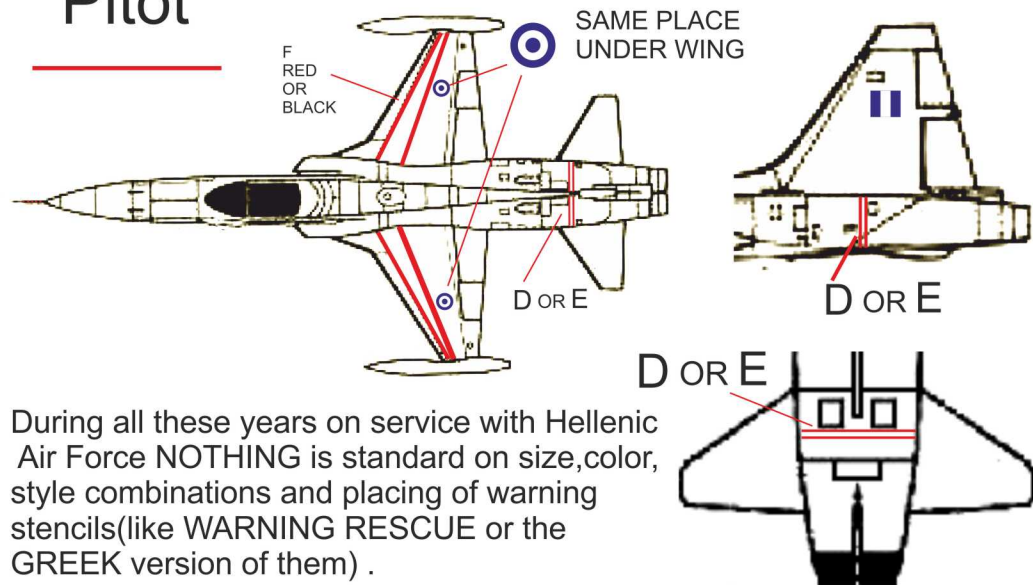

IFF ANTENNAS POSITION 4PCS

About GREEK RF-4E first 4 NEW PLANES that HAF have and DIFFERENCES with exGAF planes. WING with extended slats as F-4E DIFFERENT nose DIAS antennas on air intakes SEA camo pattern Same as F-4E with wavy bottom (NOT STANDARD BUT USALLY)

Pitot

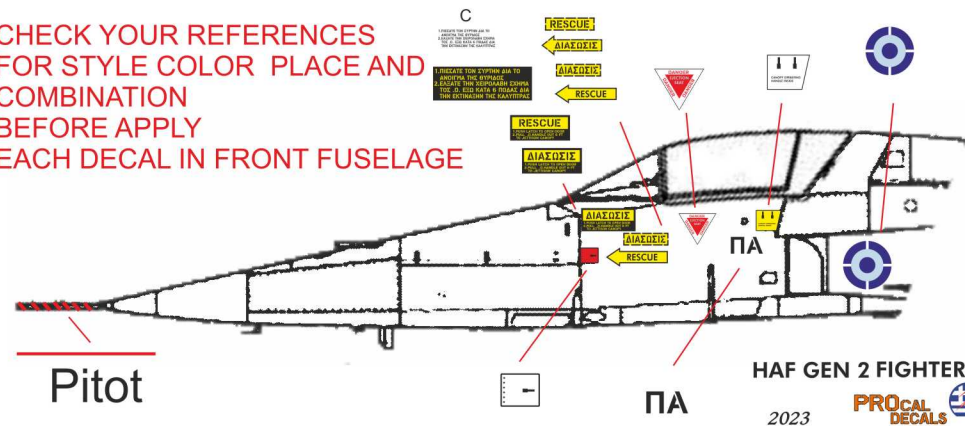

During all these years on service with Hellenic Air Force NOTHING is standard on size,color, style combinations and placing of warning stencils(like WARNING RESCUE or the GREEK version of them) . Insignias placing ARE standard to all BUT you can find differences on painting style and maybe in size (smaller for the 2 on air intakes)

Also tail numbers have differences on size style and some purposes AREN'T EVEN IN STRAIGHT LINE

We try to cover ALMOST most kind of them BUT internet and personal REFERENCES is your BEST friend.

Σχεδόν κάθε αεροσκάφος ανάλογα την χρονική περίοδο και την μοίρα που υπηρετούσε θεωρήστε ότι είναι ΜΟΝΑΔΙΚΟ ως προς τον τύπο χρώμα και συνδιασμό των προειδοποιητικών που ήταν σε αυτό. Για την καλύτερη αναπαραστασή του λοιπόν προτείνετε η ΚΑΛΗ αναζήτηση φωτογραφιών σε προσωπικά αρχεία ή στο ίντερνετ. Προσπαθήσαμε να δώσουμε όσο το δυνατόν περισσότερα από αυτά

CHECK YOUR REFERENCES FOR STYLE COLOR PLACE AND COMBINATION BEFORE APPLY EACH DECAL IN FRONT FUSELAGE

The painting patterns are same for F-5A F-5B and RF-5A
Painting lines maybe have differences from original painting style especially on AEGEAN GHOST pattern so check your references
