General instructions:

Resin parts should be cleaned of flash, thoroughly cleaned using solvent and washed in detergent.

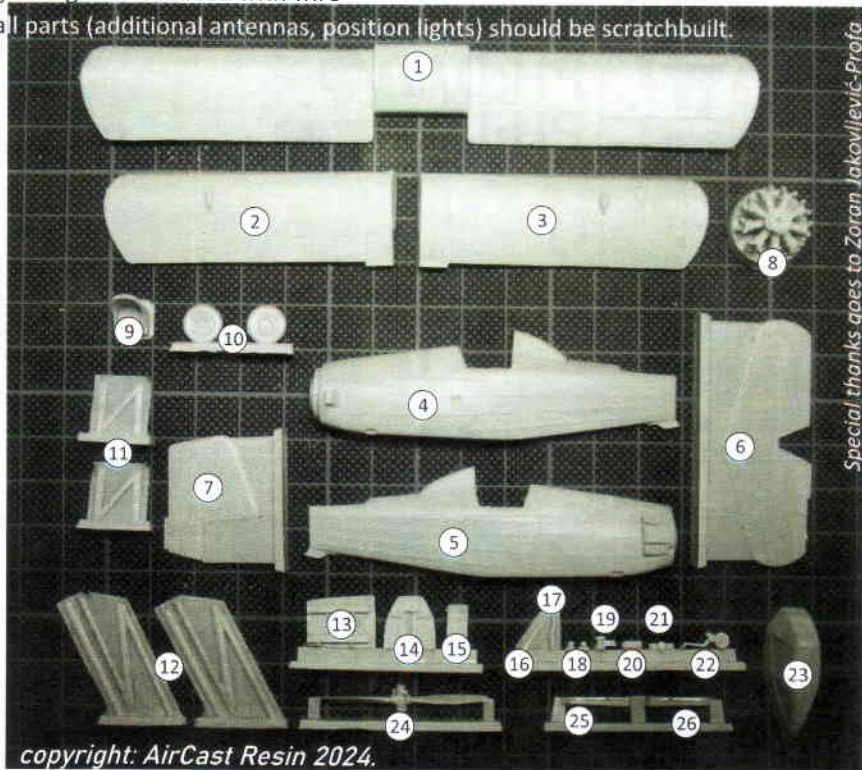

For attaching resin parts use solely cyano-acrylate glue.

Transparent parts should be glued using epoxy, white or crystal clear glue.

Notes:

- all gear legs are enforced with wire

- small parts (additional antennas, position lights) should be scratchbuilt.

Decal placement and painting tips

Dutch version:

- 1+1w. Fuselage registration (both sides)
2. Company logo (both sides)
3. Logo (both sides)
- 4+4w. Wing registration (top right and bottom left wing)
5. Propeller marking (each blade + spares)

Propeller painting and marking:

- front polished aluminium
- back painted matt black
- tips painted yellow

Greek version:

- 6+6w. Roundel (fuselage and wings)
- 7+7w. Tail registration (both sides)
8. Logo (right side)
9. Logo (left side)
10. Propeller marking (each blade + spares)

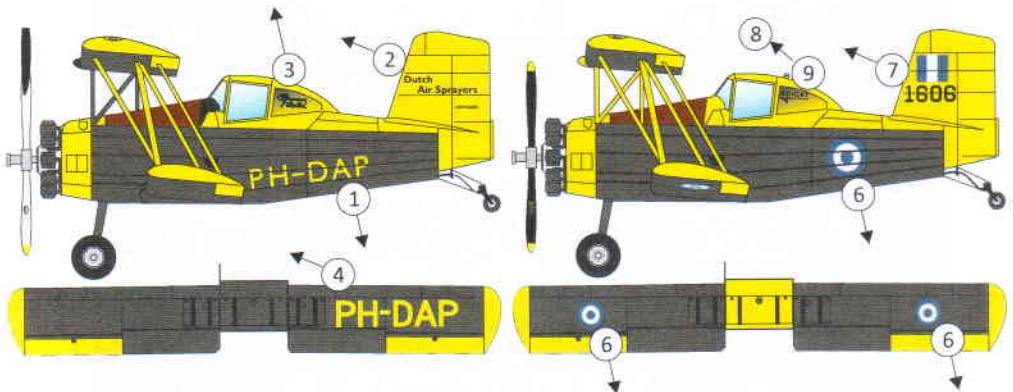

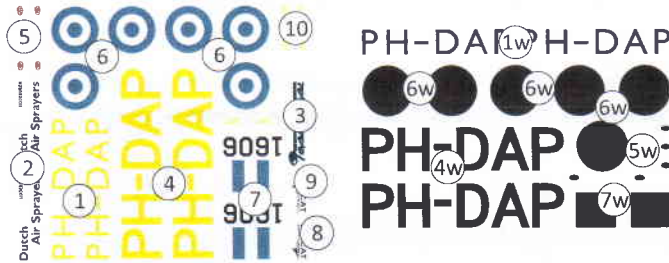

Propeller painting and marking:

- front and back painted matt black
- tips painted yellow

Notes:

- decals are home-made, so they require a bit of attention and trimming when cutting and applying.
- When white decal is needed, first place white (w) and afterwards top decal.
- Aircraft is painted in factory livery:
 - Dark gray (Carlioline B-10 RISM gray) and
 - Cream Yellow (Randolph Lacquer Y7551)
- For painting and detailing please use references available on internet
