| 8. Instrument panel                            | 22. Nose landing gear actuator                   |
| 9. Rear bulkhead                               | 23. Under-fuselage antenna                       |
| 10. Master for windshield                      | 24. Control wheel (2 pcs)                        |
| 11. Seats (7 pcs)                              | 25. Antenna (3 pcs)                              |
| 12. Seating bench (depending on configuration) | 26. Pitot tube (2 pcs)                           |
| 13. Nose landing gear and wheel                | 27. Underbelly position light                    |
| 14. Main wheel (2 pcs)                         | 28. propeler (2 pcs)                             |

## General instructions:

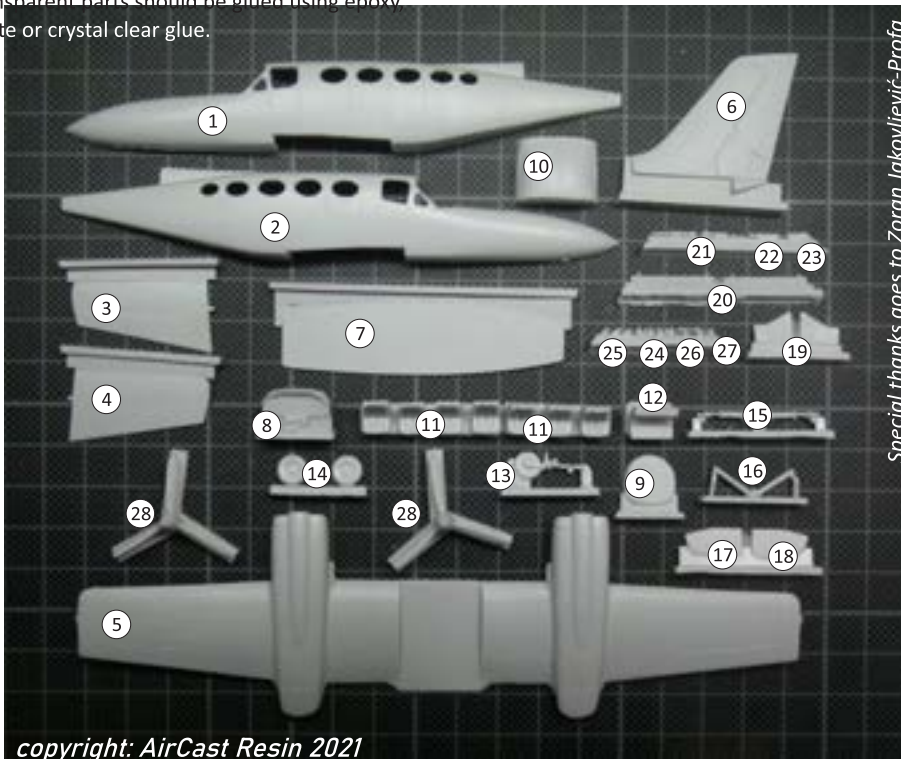

Resin parts should be cleaned of flash, thoroughly cleaned using enamel or lacquer solvent and washed in detergent solution. For attaching resin parts use solely cyano-acrylate glue.

Transparent parts should be glued using epoxy white or crystal clear glue.

## Notes:

- all gear legs are enforced with wire
- Model should be nose-balanced, so please add 6-8g of weight to avoid tail-sitting.
- small parts (additional antennas, position lights) should be scratchbuilt.

Special thanks goes to Zoran Jakovljević-Profa

## Decal placement and painting tips

1. Fuselage stripe - left
  2. Fuselage stripe - right
  3. Flag - left
  4. Flag - right
  5. Sqn number (both sides)
  - 6, 6a. RNZAF roundel (top and bottom on both wings)
- note:** Roundel on wings is positioned with the beak facing forward!
- 7a-f. RNZAF registration number (both sides)
  - 8a-f. corresponding to 7a-f (both sides)

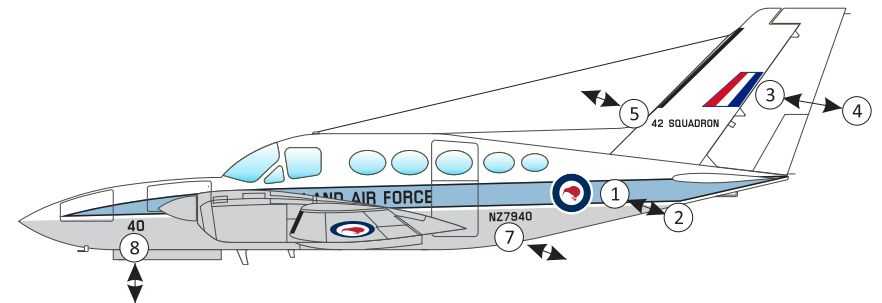

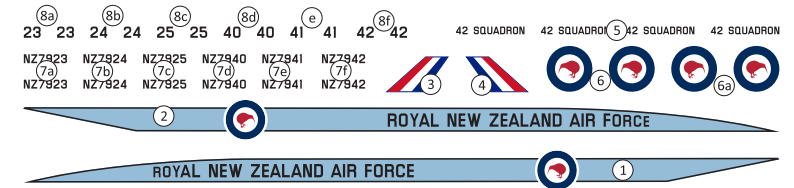

## Propeller painting and marking:

- front painted medium grey
- back painted black
- spinner polished aluminium
- a) 7923-25 white band on propeller tips
- b) 7940-42 propeller tips in white-red-white

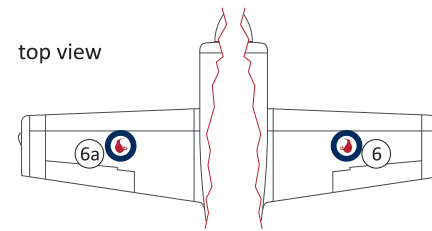

## Notes:

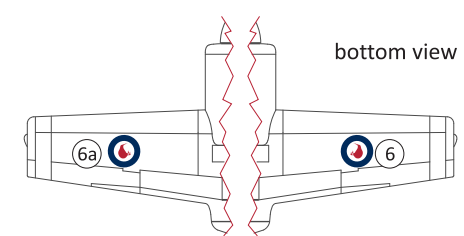

- decals are home-made, so they require a bit of attention when cutting and applying.
- For painting and detailing please use references available on internet
