U.S. AIRFORCE F-15E

IN ACTION OF OEF&OIF 美国空军F-15E“攻击鹰”战斗机

USAF addressed a requirement of a new long-range strikefighter to replace the General-Dynamic F-111 series fighter-bombers in march,1981. McDonnell Douglas take a design based on F-15 twin-seater, which equipped with a pair of conformal fuel tanks (CFT) to get a longer combat range, and have a newly designed structure. McAir's new fighter named F-15E. At the same time, General Dynamic put out the F-16XL for competition, which prolong the fuselage of the basic F-16 and use big arrow wings instead of the original main wings and horizontal tails. Both new fighters can make long range attack which USAF expected. In the year 1985, Israel Air Force use

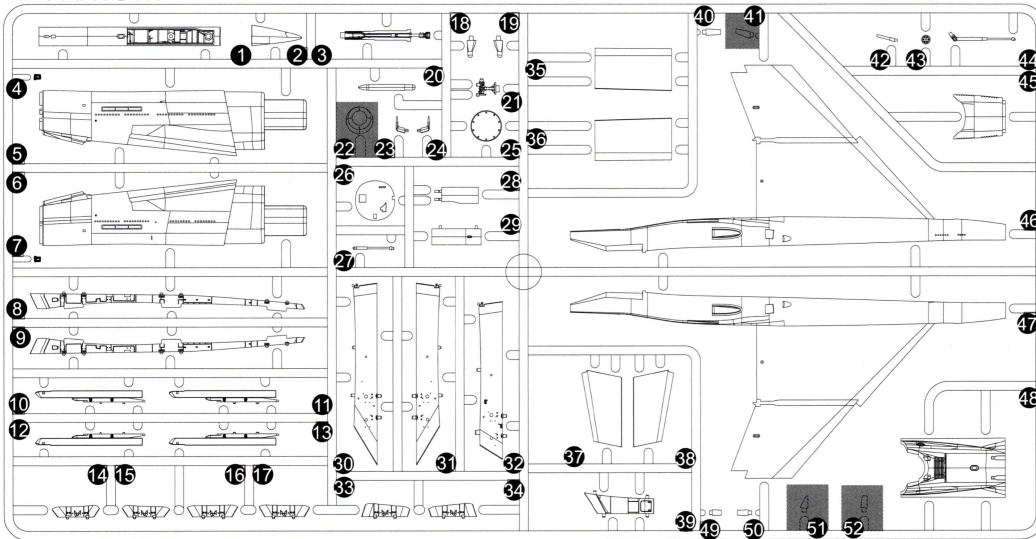

modified F-15Ds (Add CFTs and necessary avionics) take heavy guided-bombs made a very long range raid to the PLO headquarter in Tunisia, this successful attack provided a huge help to McAir's F-15E for the eventually victory. F-15Es continued the production of F-15s, after the air dominance Eagles off production. F-15E's derivative models were exported to many international users, such as Saudi Arabia's F-15S/SA, Israel's F-15I, Korean's F-15K and Singapore's F-15SG, etc. Nowadays, when USAF conduct air-to-ground attacks, F-15Es would arrive the battlefield. In the foreseeable future, Strike Eagles will remain to be the main power of the tactical strike in USAF.

1981年3月，美国空军提出了F-111战斗轰炸机后继机型的需求，麦道公司在F-15双座型飞机的基础上，加装了保形油箱，并对机体结构进行了脱胎换骨的改进，提出了F-15E“双重任务战斗机”方案，而通用动力公司则拿出了加长机体，改用箭形机翼无尾布局的F-16XL方案，二者皆可满足美国空军提出的远程打击的作战要求，在1985年，以色列用经过简单改装，加装保形油箱的F-15D双座战斗机，挂载重型制导炸弹，对远在突尼斯的巴解总部成功进行了令人难以置信的远程奔袭，这个战例无疑为麦道公司的方案送

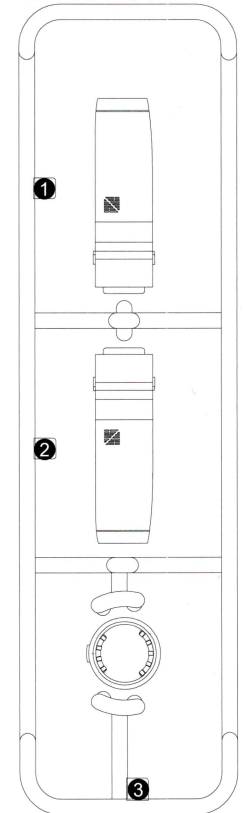

上了“神助攻”，使该公司基于现有成熟机体研发的F-15E最终战胜对手，成功入选。在F-15C/D制空型战斗机停产后，接续了F-15系列战斗机的生产。后来，基于F-15E的各种改型出口到多个国家，例如出口沙特阿拉伯的F-15S/SA，出口以色列的F-15I，出口韩国的F-15K，出口新加坡的F-15SG等。现在，只要有美国空军参与对地打击的作战行动，就有F-15E的身影出现，在可见的将来，“攻击鹰”仍然是美国空军战术打击力量的绝对主力。
